

User Guide

To use our LUTs with DJI D-LOG, we have provided a D-LOG LUT in the root folder of the pack named 'DJI D-LOG - Rec709 LUT'. Please use this on your D-LOG footage to convert your footage to Rec709, then use our Rec709 LUTs on top.

The same applies for other LOG formats, we have provided Rec709 versions for other cameras so you can use the LUTs on other LOG formats.
